MICRO SWITCH Compact Limit Switches

002409

Issue 4

Datasheet

DESCRIPTION

NGC Series

Honeywell's MICRO SWITCH Compact Limit Switches, NGC Series, are a configurable platform of medium-duty switches that allow the customer to choose SPDT (single pole, double throw) or DPDT (double pole, double throw) circuitry while maintaining the same housing and mounting footprint throughout the NGC Series. MICRO SWITCH NGC Series can be configured more than 380,000 ways, carries global approvals, and are sealed to IP67 for potential use in indoor and outdoor applications.

VALUE TO CUSTOMERS

- **Cost-effective:** Provides a single source for a compact SPDT and DPDT limit switch, which can help minimize the Original Equipment Manufacturer's sourcing expenses by simplifying their supply chain
- **Versatile:** Durable packaging allows for use in many harsh indoor or outdoor applications, providing performance confidence
- **Configurable:** Allows design engineers to standardize on a single footprint while meeting a variety of electrical requirements
- **Application support:** Customers with a global footprint can count on Honeywell for regional support for new applications and troubleshooting

DIFFERENTIATION

- With two times the vibration (10 g) and shock (50 g) ratings of comparable competitive devices, the NGC Series can be implemented in the harshest of environmental conditions, providing enhanced reliability and repeatability
- Broader current capacity (10 A) than comparable devices allows for potential use in a wider set of applications, making platform standardization an easier task

FEATURES

- SPDT or DPDT configurable circuitry
- Snap-action, positive-break contacts
- Silver alloy and gold plated contact options
- UL, CE, cUL, and CCC approvals
- Conforms to IEC 60947-5-1, IEC 61373, EN45545-2 (metal housing)
- NEMA 1, 4, 12, 13; IP67 sealing
- Metal and plastic housing options
- Cable and connector terminations
- Variety of heads and actuator levers

POTENTIAL INDUSTRIAL APPLICATIONS

- Boom position detection
- Elevators and escalators
- Machine tools
- Mobile light towers
- Packaging equipment
- Rail doors
- Scissor lifts

PORTFOLIO

The NGC Series joins the 14CE, 914CE, LS, and E6/V6 Series of Medium-Duty Limit Switches. Honeywell also offers a portfolio of MICRO SWITCH Heavy-Duty Limit Switches and Global Limit Switches.

Table 1. Specifications

Characteristic	Parameter						
Description	compact, medium-duty limit switches						
Actuators	 Side Rotary Configurations Side rotary Side rotary (short) Side rotary with adjustable length roller lever Reversed side rotary (short) Reversed side rotary with adjustable length roller lever 	 Plunger Configurations Pin plunger (standard 4,8 mm [0.19 in] and long 7,4 mm [0.29 in]) Roller plunger (standard 15,3 mm [0.60 in] and long 17,85 mm [0.70 in]) Cross roller plunger (standard 15,3 mm [0.60 in] and long 17,85 mm [0.70 in]) Pin plunger with boot seal Panel-mount pin plunger Panel-mount roller plunger Panel-mount cross roller plunger Panel-mount pin plunger with boot seal Top roller lever arm 					
Terminations (SPDT)	Normal cable, 0,75 mm ² (18 AWG) cable PUR cable, 0,75 mm ² (18 AWG) cable Special application cable, 4 & 5 x 0,75 mm ² (18 A Connector, 4-pin male, M12 thread Connector, 5-pin male, M12 thread	WG) non-halogen cable					
Terminations (DPDT)	Normal cable, 0,50 mm ² (20 AWG) cable PUR cable, 0,50 mm ² (20 AWG) cable Special application cable, 8 & 9 x 0,50 mm ² (20 A Connector, 4-pin male, M12 thread Connector, 5-pin male, M12 thread	WG) non-halogen cable					
Material approval standard	(only applicable for product with non-halogen ca DIN5510-2-2009 (flammability rating: S3; smoke toxic gas rating: FED(TZUL=15min)< 1)						
Switching options	SPDT, DPDT; snap action contacts (1NC/1NO, 2N	NC/2NO)					
Sealing	NEMA 1, 4, 12, 13; IP67 per IEC 60529 suitable for outdoor applications						
Contacts	snap action, positive break standard: silver alloy; gold: gold-plated						
Operating temperature	-25 °C to 75 °C [-13 °F to 167 °F]						
Storage temperature	-40 °C to 85 °C [-40 °F to 185 °F]						
Mechanical endurance	1NC/1NO: 5 M cycles min. at 120 CPM 2NC/1NO: 5 M cycles min. at 60 CPM						
Electrical life	1 A 110 Vdc 500,000 cycles applicable only for N	C circuit					
Thermal current	1NC/1NO: 10 A; 2NC/2NO: 5 A						
Rated insulation voltage (Ui)	1NC/1NO: 400 V as per IEC 60947-5-1 2NC/2NO: 250 V as per IEC 60947-5-1						
Dielectric strength	1890 Vac for metal housing; 2890 Vac for plastic 1500 Vac between all terminals to enclsoure afte						
Impulse voltage	1NC/1NO: 2500 Vdc as per IEC 60947-5-1 2NC/2NO: 1500 Vac as per IEC 60947-5-1						
Pollution degree	3 (III)						
Humidity	95 %RH max.						
Operating speed	0,3 mm/s to 2 m/s						
Switching frequency	1NC/1NO: 120 cpm max. 2NC/2NO: 60 cpm max.						
Shock	50 g for 11 μ s as per IEC 60068-2-27; railway application, per IEC 61373 Class I Car B type						
Vibration	10 g as per IEC 60068-2-6, frequency range 10 H railway application per IEC 61373 Class I Car B ty						
Approvals	UL (UL508), cUL, CE (IEC 60947-5-1), CCC (GB1	4048.5-2008)					
Conforming to standards	IEC 60947-5-1, IEC 61373, EN45545-2 HL 3 (m	etal housing)

How to read and understand the bar chart information

The following example relates to a unit which has a snap action basic and which has a roller pin plunger actuator. Follow the black arrows and the black strip on the chart. The black strip indicates that there is a circuit between the terminals whose numbers are shown on the left and when white there is no circuit.

Look at Figures A and B as examples. Actuator type used for test is the linear Cam travel type (b) shown left. The start point is at the arrow marked "A" (See fig. B). This shows the free position to be 5.3 mm from the vertical center line of the unit. At this stage there is a circuit between the terminals 21-22 but no circuit between terminals 13-14. The unit can be actuated until it reaches the operating position which is 10,5 mm from the center line – a travel distance of 10,5 – 5,3 = 5,2 mm from the free position. At this point the circuit arrangement changes – no circuit between 21-22 but making a circuit between 13-14. If, however, the contacts of terminals 21-22 weld together and will not separate, a mechanical safety feature will take effect if the switch is travelled past the point from which positive opening is assured, 13,9 mm. As the switch returns it reaches the release position at 8,9 mm from the center line. The circuit will change back to the original state and the difference between the operating position and the release position gives what is known as the differential travel i.e. 10,5 - 8,9 = 1,6 mm. The asterisk (*) indicates the point from which the positive opening is assured.

Honeywell serves its customers through a worldwide network of sales offices, representatives and distributors. For application assistance, current specifications, pricing or name of the nearest Authorized Distributor, contact your local sales office. To learn more about Honeywell's products, call **+1-815-235-6847 or 1-800-537-6945**, visit **sensing.honeywell.com**, or e-mail inquiries to **info.sc@honeywell.com**

A WARNING PERSONAL INJURY

DO NOT USE these products as safety or emergency stop devices or in any other application where failure of the product could result in personal injury.

Failure to comply with these instructions could result in death or serious injury.

▲ WARNING MISUSE OF DOCUMENTATION

- The information presented in this product sheet is for reference only. Do not use this document as a product installation guide.
- Complete installation, operation, and maintenance information is provided in the instructions supplied with each product.

Failure to comply with these instructions could result in death or serious injury.

Warranty/Remedy

Honeywell warrants goods of its manufacture as being free of defective materials and faulty workmanship. Honeywell's standard product warranty applies unless agreed to otherwise by Honeywell in writing; please refer to your order acknowledgement or consult your local sales office for specific warranty details. If warranted goods are returned to Honeywell during the period of coverage, Honeywell will repair or replace, at its option, without charge those items it finds defective.

The foregoing is buyer's sole remedy and is in lieu of all other warranties, expressed or implied, including those of merchantability and fitness for a particular purpose. In no event shall Honeywell be liable for consequential, special, or indirect damages.

While we provide application assistance personally, through our literature and the Honeywell web site, it is up to the customer to determine the suitability of the product in the application.

Specifications may change without notice. The information we supply is believed to be accurate and reliable as of this printing. However, we assume no responsibility for its use.
